

Technical Maintenance & Equipment Inspection

Date: 2026-09-27

Client Name:	56456456	Site / Branch:	yutyuit
Contact Person:	jkvfghgc	Contact Phone:	jkhouihgou

Equipment Model:	iohiy8	Serial Number:	ihioho
Operating Hours:	29	Service Type:	Commissioning & Setup

40. No function			40. One signal pulsed out, hydraulics 2			Enabling of power units		
41. No function	LLC FE 41		41. No function	LLC FE 41		The power units control their assigned motors independently. The power units are controlled via the CANbus in the VCU. Via the CANbus, the power unit receives information about the extended status and the required motor speed. If a failure occurs, the power unit can enable the power units separately. This is achieved via a negative signal, which is sent to the corresponding power unit by the control system.		
42. Feedback signal voltage 12 V from power unit 141	LLC FE 141		42. Feedback signal voltage 27V aux, hydraulics 19	LLC FE 19		Power unit 141		
43. Motor relay driver 1 (wiring 245) not working	LLC FE 242		43. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
44. Motor relay driver 2 (wiring 245) not working	LLC FE 243		44. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
45. Motor relay driver 3 (wiring 245) not working	LLC FE 244		45. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
46. Motor relay driver 4 (wiring 245) not working	LLC FE 245		46. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
47. Motor relay driver 5 (wiring 245) not working	LLC FE 246		47. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
48. Motor relay driver 6 (wiring 245) not working	LLC FE 247		48. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
49. Motor relay driver 7 (wiring 245) not working	LLC FE 248		49. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
50. Motor relay driver 8 (wiring 245) not working	LLC FE 249		50. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
51. Motor relay driver 9 (wiring 245) not working	LLC FE 250		51. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
52. Motor relay driver 10 (wiring 245) not working	LLC FE 251		52. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
53. Motor relay driver 11 (wiring 245) not working	LLC FE 252		53. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
54. Motor relay driver 12 (wiring 245) not working	LLC FE 253		54. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
55. Motor relay driver 13 (wiring 245) not working	LLC FE 254		55. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
56. Motor relay driver 14 (wiring 245) not working	LLC FE 255		56. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
57. Motor relay driver 15 (wiring 245) not working	LLC FE 256		57. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
58. Motor relay driver 16 (wiring 245) not working	LLC FE 257		58. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
59. Motor relay driver 17 (wiring 245) not working	LLC FE 258		59. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
60. Motor relay driver 18 (wiring 245) not working	LLC FE 259		60. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
61. Motor relay driver 19 (wiring 245) not working	LLC FE 260		61. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
62. Motor relay driver 20 (wiring 245) not working	LLC FE 261		62. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
63. Motor relay driver 21 (wiring 245) not working	LLC FE 262		63. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
64. Motor relay driver 22 (wiring 245) not working	LLC FE 263		64. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
65. Motor relay driver 23 (wiring 245) not working	LLC FE 264		65. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
66. Motor relay driver 24 (wiring 245) not working	LLC FE 265		66. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
67. Motor relay driver 25 (wiring 245) not working	LLC FE 266		67. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
68. Motor relay driver 26 (wiring 245) not working	LLC FE 267		68. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
69. Motor relay driver 27 (wiring 245) not working	LLC FE 268		69. Reference signal pulsed (W2) bearing	LLC FE 41		Enable signal from X13-10		
70. Motor relay driver 28 (wiring 245) not working	LLC FE 269		70. Reference signal pulsed (W2) bearing	LLC FE 41		Power unit 241		
71. Motor relay driver 29 (wiring 245
